

BREAST AESTHETICS

Each woman who considers breast cosmetic surgery for enhancement, augmentation, revision and reconstructive surgery or reduction is unique with her own personal goals and her desired aesthetic approach.

A diverse group of women choose breast cosmetic surgery, many of these women desire a more proportional figure, which can be achieved by restoring or reshaping the look of their breasts. Whether before or after child birth and breast feeding, or after significant weight loss women often choose cosmetic surgery for the breasts to match their outer appearance with positive ways they feel on the inside.

PIN HOLE COSMETIC SURGERY FOR THE BREAST

SCAR-LESS COSMETIC SURGERY OF BREASTS:

Pin hole surgery- scar-less breast surgery both in male and female.
Cosmetic surgery: modern instruments of fine 2mm and 3mm cannulas, especially zirconium-coated cell-friendly cannulas, cause less damage to the soft tissue, provide good protection for the new vascular bundles, and enable a cosmetic surgeon to perform pin-hole

surgery and scar-less breast reduction both in male and female.

BEAUTY: "Breast aesthetic augmentation by autologous tissue" is refined procedure by utilization of such fine instrumentations as mentioned above.

Scar-less breast augmentation and breast reduction are carried out regularly at the KMCH cosmetic Surgery Department.
